Master's student in Mechanical Engineering and Engineering Management at CU Boulder, with experience in product design and manufacturing. Seeking an internship in Winter-Spring 2027 in mechanical engineering product design.

Education

University of Colorado Boulder

Expected [May 2028]

Master of Science (MS) Mechanical Engineering | (MS) Engineering Management

Relevant Coursework: Advanced Product Design, Design for Manufacturing, Engineering Communication

University of California Berkeley

2021- December 2025

Bachelor of Science (BS) Mechanical Engineering | GPA: 3.88

Relevant Coursework: Solid Mechanics, Materials Science, Statistics and Data Science, Composites, Linkages, Dynamics, Heat Transfer, Fluid Dynamics, Electrical Engineering, Dynamic System and Feedback, Manufacturing and Design Communication, Multivariable Calculus, Linear Algebra and Differential Equations, Mechatronics Design

Los Gatos High School, California

2017-2021

LEAD Program | GPA 4.33 | Excellence in STEM Award, Varsity Cross Country, Sparkle On Scholarship

Skills

Design & Analysis: SolidWorks, Siemens NX, PTC Creo, Autodesk Fusion 360, AutoCAD, Ansys FEA

Manufacturing: Lathe, Mill, TIG Welding, CNC, Additive, Composite Layups, Laser Cutting, Injection Molding

Programming: MATLAB, Mathematica, JavaScript, Python, ESP32, Arduino, JMP, Claude AI

Experience

SRAM | Colorado Springs, CO

Rear Shock Design Engineering Intern

January - May 2026

- Designed, prototyped, and tested several injection molded parts for future production rear shock airspring
- Completed concept CAD and ran MATLAB simulations for adjustable compression/rebound hydraulic damper

Front Derailleur Design Engineering Intern

May - August 2025

- Developed prototypes, molds, and fixtures using FEA optimization, generative design, and drawings in Creo
- Redesigned production link for injection molding, achieving 51% lighter, 44% stiffer, and 10x less expensive part

Apple | Cupertino, CA

January - August 2024

Watch Product Design Intern

- Module-level design with assembly of 16 parts, determined datum structures and performed tolerance analysis to ensure proper fit and function across part distributions. DFM for CNC, die-cut, and IM components
- Designed o-ring seal for optimal compression, stretch, and gland fill at MMC and LMC part tolerance conditions
- PD for flexible printed circuit board, worked with EE and layout teams to define PCB outline, released IDX file
- DRI for component in Watch Series 10, worked with vendors and completed Rev A drawing release process
- Design of spring-loaded mechanisms for future architecture, kicked off CNC prototypes for user experience

Calfee Design | Santa Cruz, CA

May - August 2023

Mechanical Engineering Intern

- Internship project focused on the design of a carbon fiber full suspension mountain bike in 2D and 3D CAD
- Hands on manufacturing experience, programmed and ran CNC mill to create molds for carbon fiber components

Bike Builders of Berkeley | Engineering Club at UC Berkeley

August 2021 - December 2025

Frame Team Lead

- Led team of undergrads to design printed aluminum lugs for lugged carbon fiber downhill bike project
- Created custom linkage design and machined components for steel full suspension mountain bike
- Designed parametric welding and tube mitering jigs to fabricate custom geometry steel frames

Background and Interests

Cycling

- 2024 & 2025 collegiate mountain bike National Champion, former President of Cal Cycling team

Scouting

- Eagle Scout from Troop 2 Los Gatos. Eagle Scout project is a trailhead signboard at Soquel Demonstration State Forest. Multiple leadership positions over 10 years including Senior Patrol Leader in a troop of 40 active scouts
